

Cables & Brushes

The sleeve is flexible on the 6 mm (1/4 in) cable.

The 6 mm cable should be used inside ducts that are 80 mm - 200 mm (3 in - 8 in) wide.

It is also suitable for ducts that have many turns because of the flexible sleeve.. The sleeve on the 7 mm (0,276 in) cable is stiffer and should be used inside ducts that are 100 mm - 400 mm (4 in - 16 in) wide.

Here are some samples of our brushes.

Nylon brushes, nylon brushes with reinforcement, nylon brushes with steel, are made in the dimension from 30 mm up to 1200 mm (1 in - 480 in) .

Steel brushes are made in dimensions from 30 mm up to 3000 mm (1 in - 1200 in).

Brushes and Cables are made to your specifications.
